A Veteran-Owned Company Serving the National Interest

CORPORATE OVERVIEW

Mr. W. Andrew Glasscock
Co-Founder and Managing Partner

Sage Management is a provider of Professional Management, Engineering, Intelligence Analysis, Training and Modeling & Simulation Services to Federal & State Government.

Mr. Sean Keller
Co-Founder and Managing Partner

Founded in 2004, Sage Management, a Veteran-Owned Small Business, specializes in innovative and creative solutions to unique national security challenges. Our consultants provide full system lifecycle support from concept exploration through system development, implementation and fielding, to system retirement.

Mr. Pete Ward
Managing Partner

Mr. Tony Frederickson
Managing Partner

Sage Management has extensive experience in the development and management of complex information technology systems. We have developed and employed enterprise architectures to better understand legacy and future systems and their interactions with other complex C4ISR systems. We perform system and technology assessments to better provide our customers with answers to their technology insertion questions.

Dr. Jim Withington
Partner & Chief Technology Officer

Mr. Steve Max
VP, Western Region

Our real world experience gives us unique insight into the demanding environment of national and military intelligence operations and mission support and how Geographic Information Systems can deliver quality, actionable intelligence to the Warfighter.

Mr. Larry Harper
VP, Contracts & Finance

Mr. R. Todd Raetz
Chief, Human Capital

Our Intelligence Analysts have provided critical, time-sensitive intelligence operational support to key decision makers. We have developed unique applications to model and simulate the effects of CBRN incidents and have provided training to a myriad of customers in CBRNE decision making. Further, we provide expert analysis and support of critical tactical-level C4ISR system to the Warfighter.

Our consultants come with a variety of backgrounds and experiences and with impeccable credentials. Many are certified in software and system engineering, along with acquisition program management and test and evaluation. Others have spent entire careers in the dynamic environment of tactical and national-level intelligence analysis. Contact us today to learn how we can assist you!
