Information Paper – Joint Command, Control, Communications, Computers, Intelligence, Surveillance, and Reconnaissance (C4ISR) Support at Sage Management

Purpose: The purpose of this Information Paper is to describe Sage Management’s extensive experience in providing Joint C4ISR Support.

The Challenge: The ability to collect, interpret and fuse intelligence data is critical to national security decision making. In the dynamic information environment, responsive C4ISR solutions and assembling the right mix of personnel and experience fully ready to deliver flexible and dependable services can mean the difference between mission success and mission failure.

Introduction: Sage Management has extensive experience in providing C4ISR support for mission critical organizations. Key features of Sage:

1. Veteran-owned Small Business
2. Started in 2004 in Pasadena, MD, now located in Hanover, MD
3. Focus Areas
 - a. C4ISR Support
 - b. Multi-INT Analysis
 - c. Test and Evaluation
 - d. Full Lifecycle Program Management
 - e. Professional Engineering Support Services (Software & System)
 - f. GIS Consulting

Experience: The craft of determining solid C4ISR solutions requires creative thinking to complex national security challenges. Sage intelligence professionals have years of real-world, operational experience. Whether it is collection management or counterintelligence, Sage professionals have the know-how and ability to get the job done. Mission first!

1. Collection Management
2. All-Source and Multi-INT Analysis & Fusion
3. Multi-INT Operational Support (SIGINT, IMINT, CI/HUMINT, etc.)
4. Targeting
5. Intelligence Information Requirements
6. User Requirements, Operational Concepts, and Systems Architectures
7. Network Analysis
8. Intelligence Training Development, Instruction/Training, and Training Support
9. C4ISR System Test and Evaluation
10. C4ISR System Interoperability
