Information Paper – Geospatial Information Systems at Sage Management

Purpose: The purpose of this Information Paper is to describe Sage Management’s extensive experience in providing GIS services and support.

The Challenge: The ability to visualize data has increased exponentially. However, many organizations have not maximized the potential of their data. As a commodity, organizational data becomes a force multiplier. Capturing data and presenting it for fluid decision making requires in-depth understanding of the complexities of Geospatial Information Systems (GIS).

Introduction: Sage Management has extensive experience in providing GIS support and services for mission critical organizations. Key features of Sage:

1. Veteran-owned Small Business
2. Inc. 500 Company headquartered in Columbia, MD with locations in Virginia, New Jersey, California and Arizona
3. Focus Areas
 - a. Full Lifecycle Program Management
 - b. Professional Engineering Support Services (Software & System)
 - c. Modeling & Simulation
 - d. GIS Consulting
 - e. Intelligence Analysis

Experience: When it comes to complex GIS and data visualization, experience and objectivity count. Sage professionals come with many years of experience and impeccable credentials. Our GIS Services and Support experience is a force multiplier. As an ESRI Certified Business Partner, Sage brings the full spectrum of GIS technologies and capabilities to our national security and state government customers.

1. Cartography and Visualization
2. Geospatial Data
3. Spatial Analyses
4. ArcGIS customization (VBA)
5. Geoprocessing (Models and Scripts)
6. Information Services Distribution
7. Training
8. System Fielding

POC: Mr. Jason Mielke, Sage Management, 410-259-9960
