Information Paper – Intelligence Analysis at Sage Management

Purpose: The purpose of this Information Paper is to describe Sage Management’s extensive experience in providing Intelligence Analysis Support.

The Challenge: The ability to collect, interpret and fuse intelligence data is critical to national security decision making. In the dynamic information environment, responsive intelligence analysis can mean the difference between mission success and mission failure.

Introduction: Sage Management has extensive experience in providing Intelligence analysis and support for mission critical organizations. Key features of Sage:

1. Veteran-owned Small Business
2. Started in 2004 in Pasadena, MD, now located in Hanover, MD
3. Focus Areas
 - a. Full Lifecycle Program Management
 - b. Professional Engineering Support Services (Software & System)
 - c. GIS Consulting
 - d. Intelligence Analysis

Experience: The craft of solid intelligence analysis requires creative thinking to complex national security challenges. Sage intelligence analysts have years of real-world, operational experience. Whether it is collection management or counterintelligence, Sage professionals have the know-how and ability to get the job done. Mission first!

1. Collection Management
2. Imagery Analysis
3. Signals Intelligence
4. Network Analysis
5. Counterintelligence
6. Multi-Intelligence Fusion
7. Intelligence Information Requirements
8. Operational Intelligence
9. Targeting
