## **Information Paper – Program Management Support at Sage Management**

**Purpose:** The purpose of this Information Paper is to describe Sage Management’s extensive experience in managing complex information management system projects.

**The Challenge:** Many system deployments and system upgrades are significantly delayed because of inadequate oversight of the system development and fielding process. This causes delays in the deployment of mission critical capabilities, increases cost, and poor service to customers and constituents.

**Introduction:** Sage Management has extensive experience in managing complex mission-critical information systems and networks. Key features of Sage:

1. Veteran-owned Small Business
2. Inc. 500 Company headquartered in Columbia, MD with locations in Virginia, New Jersey, California and Arizona
3. Focus Areas
  - a. Full Lifecycle Program Management
  - b. Engineering Solutions (Software & System)
  - c. 3D Virtual Simulation & Training

**Experience:** When it comes to managing critical information systems, experience counts. Sage professionals come with many years of experience and impeccable credentials, to include technical experience along with Defense Acquisition Workforce Improvement Act (DAWIA) or Project Management Institute (PMI) project management certifications. Our Program/Project Management experience stretches across the entire system lifecycle in both the government and commercial environments. This includes:

1. Government & Industry Certified Project Managers (DAWIA & PMI)
2. Major DoD Systems Acquisition
3. Contract Development, Execution & Closeout
4. Systems Engineering and Computer Network Defense
5. Program Financial Management
6. Project Planning & Execution
7. Project Scheduling
8. Logistics Support Planning
9. Oversight & Compliance
10. Global Systems Fielding
